Tapelight (CoB)

Tapelight (CoB)

D21TCoB1

Product Overview

Flexible and easy-to-install, our CoB Tapelight provides smooth lighting with no individually visible diodes for a clean, illuminated look that fits all sorts of architectural installs!

Unlike standard (SMD) LED strips which feature individually-spaced diodes, Chip-on-Board (CoB) strips pack multiple LEDs together under a continuous phosphor layer for a neon-like effect with no visible dots.
